Today's Learning Objectives:

1. Discuss how to utilize new information about children's health in Hood County.
2. Describe Cook Children's Health Care System's next community children's health action steps.
3. Define their individual role and personal commitment to improving the overall health of children.

Conflict of Interest Disclosure:
Neither I nor my immediate family members have any commercial interest in any amount that creates an actual, potential or perceived conflict of interest.
KEEPING OUR PROMISE

Knowing that every child’s life is sacred, it is the promise of Cook Children’s to improve the health of every child in our region through the prevention and treatment of illness, disease and injury.
Top child health issues for Cook Children’s

- Asthma
- Accident (Safety)
- Access
- Mental
- Weight
- Abuse
- Dental
Cook Children’s is committed to...

Giving our community access to the data and the tools to act

Continuing to use the data to research, understand and communicate children’s health issues and potential solutions

Creating a “Center for Children’s Health” to sustain this effort
The center’s goal is to create aligned collaborations that will allow us to make our North Texas region one of the healthiest places to raise a child.

Be among the first to see the results from the 2010 Community-wide Children's Health Assessment & Planning Survey (CCHAPS). Click here to register.

Welcome to The Center for Children's Health, led by Cook Children's, home to the Community-wide Children's Health Assessment & Planning Survey (CCHAPS), Community Health Outreach and Community Health Research. The center's goal is to create aligned collaborations that will allow us to make our North Texas region one of the healthiest places to raise a child.

Recognizing that no one organization can make this happen alone, Cook Children's and The Center for Children's Health are working with other like-minded organizations in its six-county region. We are committed to providing resources and facilitating collaboration in communities interested in children's health.
Children’s health issues identified through CCHAPS

Health Issues

Through a rigorous process and many collaborative ventures, Cook Children’s used CCHAPS data to pinpoint seven key issues impacting the health of children in our community. These issues include:

- Abuse
- Access to care
- Asthma
- Dental health
- Mental health
- Obesity
- Safety

Coalitions have formed in each of the outlying counties in our service region to address one of these issues. The individual counties chose:

- Denton County - mental health
- Hood County - child abuse prevention
- Johnson County - childhood obesity prevention
- Parker County - childhood obesity prevention
- Tarrant County - dental health, mental health, safety and prevention
- Wise County - child abuse prevention

As progress is made, the coalitions will tackle additional children’s health issues.

Tarrant County is home to several coalitions led or funded by Cook Children’s that also focus on these issues. The Community Health Outreach department at Cook Children’s leads the Children’s Oral Health Coalition, Safe Kids Tarrant County and Save a Smile.
The Center for Children’s Health county coalitions

The Center for Children’s Health is proud to lead coalitions in our six-county region that are dedicated to making North Texas one of the healthiest places to raise a child by 2030. These coalitions are responsible for bringing together key stakeholders who are committed to improving the health and well-being of children ages 0-14 in their regions.

Hood County for Healthy Children

Hood County Child Health Summit – Thursday, March 7th
10 am – 2 pm; Location – Granbury Resort Conference Center
621 E Pearl St, Granbury, TX 76048
Register to attend

Hood County for Healthy Children

Hood County is a community where children are safe, secure, healthy and have a strong sense of self-worth.

According to Child Protective Services, more than 10,000 children in Hood County were
Hood County profile:
Children 0-14 9,770 (Clairton 2010)
Hood County contains one primary population center: Granbury
The county seat is Granbury

Children who are abused are more likely to have:

- School problems including suspension (CCHAPS 2008)
- Physical health problems and mental illness (Centers for Disease Control and Prevention 2010)
- Higher rates of unemployment, poverty, and use of social services (National Institute of Mental Health 2009)
- Severe injury and death when under 4 years of age (Centers for Disease Control and Prevention 2010)

Regional coordinator:
Marsha Waters
602-685-3968
marshawaters@cookchildrens.org

Coalition officers:
Nancy Abee, Chair
Rebecca Lucas, Vice Chair
Marsha Waters, Secretary

Coalition members:
- Abilene Behavioral Health
- Abilene United Methodist Church
- Aging and Disability Resource Center (ADRC)
- Catholic Charities Fort Worth
- Granbury Independent School District
- Granbury Police Department
- Hand in Hand
- Hood County Government
- Hood County Children's Charity Fund Inc
- Hood County Sheriff's Office
- Hood County Substance Abuse Council

Hood County for Healthy Children strategic plan objectives:

- Create a community coalition to improve children's health in Hood County
- Increase community awareness to support good parenting and healthy children
- Develop community opportunities to support good parenting and healthy children
- Continue monitoring children's health issues to support a community where children are safe, secure and healthy

Coalition in action:
Hood County for Healthy Children coalition members are currently exploring a variety of approaches to prevent child abuse in their community including the possibility of partnering...

Community-wide Children’s Health Assessment & Planning Survey (CCHAPS) data results

Announcing 2012 CCHAPS survey results!

We are pleased to share our ongoing commitment to the community and our continued efforts to address children's health issues by sharing the results from the 2012 CCHAPS. The results from the survey provide another data point and an update on the health of children in our six-county service area.

Through this survey, we hope to build on the baseline of data we've already gathered and further refine the questions to uncover more specific information.

As with the 2008 CCHAPS, the ETC Institute executed the primary research for this project and followed much of the same protocols as the original survey, including:

- Hosting a technical review panel of survey experts to guide our survey process
- Reviewing secondary data (Healthy People 2020, Kids COUNT and the National Survey of Children’s Health)
- Surveying a representative sample of the population ages 0-14 in our six-county region, which includes Denton, Hood, Johnson, Parker, Tarrant and Wise
- Conducting post-survey focus groups with both parents and children for response clarity
Community-wide Children's Health Assessment & Planning Survey results CCHAPS

Search Data

2008 and 2012 Community-wide Children’s Health Assessment and Planning Survey

The survey data available for query on this Web site was collected by ETC Institute as directed by Cook Children’s Health Care System. The survey data was a result of a random, mailed survey to households with children 0-14 years of age. It includes households in Tarrant, Denton, Johnson, Parker, Hood and Wise counties. A total of 7,459 complete surveys were received from a mailing of 21,550 in 2008. A total of 8,394 complete surveys were received from a mailing of 33,000 in 2012. The respondents answered more than 60 questions about the health and overall well-being of one child in their home.

SO NOW WHAT?
The World Health Organization and the United States’ Centers for Disease Control and Prevention agree:

80% of all chronic disease is preventable
Leading cause of death in US for all ages?

Children 0-14 are 18% of Hood County’s population.

But they are 100% of our future.
THANK YOU FOR YOUR HELP
