Other Comments

Understanding Poverty required for those in public education. Needs to be introduced to all segments of our community.
Addressing stigma and cultural barriers to care in such areas as mental health & obesity
Thank you for allowing me to attend. I am hoping to obtain information and ideas for McLennan County.
Parent education to raise healthy children
How does Medicaid/CHIPs work, what will they pay for, how can you get in touch with the right people to check what will be paid for
Would like to see more focus on children's mental and behavioral health
Implementation of local students in all of our outpatient health clinics for Cook Children's and JPS-We have many medical, dental paraprofessionals who must train via clinical externships-We need to open up opportunities for our next generation
Health clinic resources through Cook HSC
Nutrition for families
Educating community coalitions/groups about Medicaid/CHIPs
Engaging the business community in health children initiatives
Tobacco use and secondhand smoke issues; Secondhand smoke in relation to asthma
Workshop on tobacco health issues and secondhand smoke exposure (which leads to asthma) with education on specific consequences to children
Building and maintaining the "built environment" of neighborhoods to encourage greater physical activity and being more active in general (walking, etc.)
Research based best proactive related to health outcomes for children (what activities does research support having positive impact on BMI, ATOD, sexual abstinence, moderate to vigorous activity); Specific collaborative work on tracking childhood health issues as partners in Fort Worth
Creating a database of local resources
Best practices is very important
Call on Cook Children's primary care and neighborhood clinics
