

Desktop Skill Booster: Draws attention to key messages from training to reinforce learning. Booster is created by lead trainer; recipients are those attending the training.

Prepared for American Evaluation Association Conference | Session 1776 | October 28, 2016

Whole Brain Thinking Model

This model is important when delivering education to others, and also helps to know our own preferred learning style. Knowing how you learn and how other CHO team members learn can help us understand each other better, especially when we collaborate on projects together.

WHOLE BRAIN® MODEL
