(Annual Target: 25,000)

### How well did we do it?

**90%** children's oral health kits distributed to partners serving low-income zip codes  
(Annual Target: 90%)

**92%** oral health educational resources distributed to partners serving low-income zip codes

# Oral Health Snap Shot

## Community Engagement

Ambassador Training

Community Collaboration

### How much did we do?

- 3** four-hour oral health training sessions were held  
(Annual Target: 3)
- 39** community partners trained to become ambassadors: teaching families about oral health practices for children ages 0 - 4  
(Annual Target: 45)
- 21** coalition, subcommittee and stakeholder meetings hosted  
(Annual Target: 19)
- 997** individual/group volunteer hours invested by **75** individuals and **13** corporate/community organizations  
(Unduplicated)

### How well did we do it?

- 100%** of ambassadors were satisfied with the oral health training (N = 39)  
(Annual Target: 90%)
- 344** reported ambassador encounters with families about oral health (May be duplicated)
- 98%** coalition members reporting that they are satisfied with the progress made on Coalition's priority objectives (N = 28)  
(Annual Target: 80%)

### Are children better off?

- 88%** of ambassadors correctly identified the correct tool and strategy for teaching specific oral health information, from the tools taught in the training below:  
(N = 9, New survey began Q3)
  - Infant and Resource Brochures
  - Dental puppet and toothbrush
  - Two person position
  - Go, Slow, Whoa Cards
- 95%** of ambassadors understand basic principles and tips for helping families obtain a dental home and prepare their children for dental visits  
(N = 9, New survey began Q3)
